

ELERTS Situational Awareness Platform for Airports

Airport Employees, Ambassadors, concessionaires, and passengers want to help. ELERTS makes helping easy with a simple, reliable reporting platform to notify your team of safety, operations, and customer experience issues.

Trusted by major airports and transit systems across North America:

DFW Dallas-Fort Worth DFW

DEN Denver INTL. AIRPORT

SEA Seattle-Tacoma INTL. AIRPORT

PHX Phoenix Sky Harbor

LAX Los Angeles LAX

BART San Francisco BART

T Boston MBTA

DART Dallas DART

LYNX Orlando LYNX

SEPTA SE Pennsylvania SEPTA

TTC Toronto TTC

METRA Chicago METRA

RTC Las Vegas RTC

- The See Say Airport platform enables two-way communication with dispatchers so that reports are acknowledged and questions are answered
- Your "helpers" report what they see and hear in real-time, with descriptions of incidents/issues plus photos or video.
- Users can send a report at any time- discreetly and anonymously.
- GPS location is sent with reports, so your teams know exactly where action is needed.
- Safety, security, and customer experience are improved without additional staffing.
- Providing this direct channel of communications keeps complaints off of social media and enables faster action.
- The platform includes a web-based management console for your dispatch, operations, and security teams.
- Simple and easy, operates on iPhone or Android devices.
- Multiple ways to submit reports: mobile app, texting, QR/webform, and more.
- Easy to Integrate with other IT systems such as Esri, Maximo, Power BI, ProDIGIQ, Salesforce and more.

Leverage the power of human intuition and observation. With crowdsourced information gathering, everyday people (and their smartphones) become the eyes and ears of your airport so you are aware of issues sooner.
